

WORK MANAGE

This is my final project when I take courses in Purwadhika. This is webapps Work Manage. This website still under development according to minor bugs. But you can see the preview of this web in the attachment image below

Technologies in this web app :

- ReactJs
- MySql
- Express JS
- Node.js
- React-redux

The features in this web App :

(Employee) :

1. Employee can update profile like name, nik, phone number, email, etc
2. When have get the task employee can upload file for task
3. if the employee's task exceeds the deadline then the status is too late
4. Employee can see the salary every month
5. Employee have their respective divisions eg (Programmer)
6. Employee have Sub Division (profession)

(Manager) :

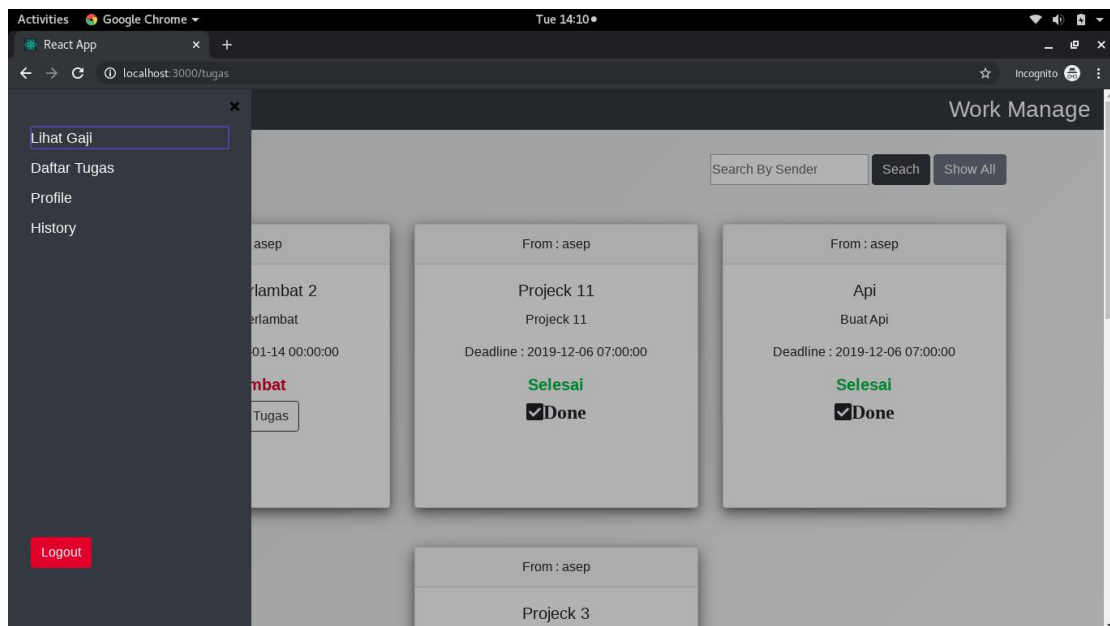

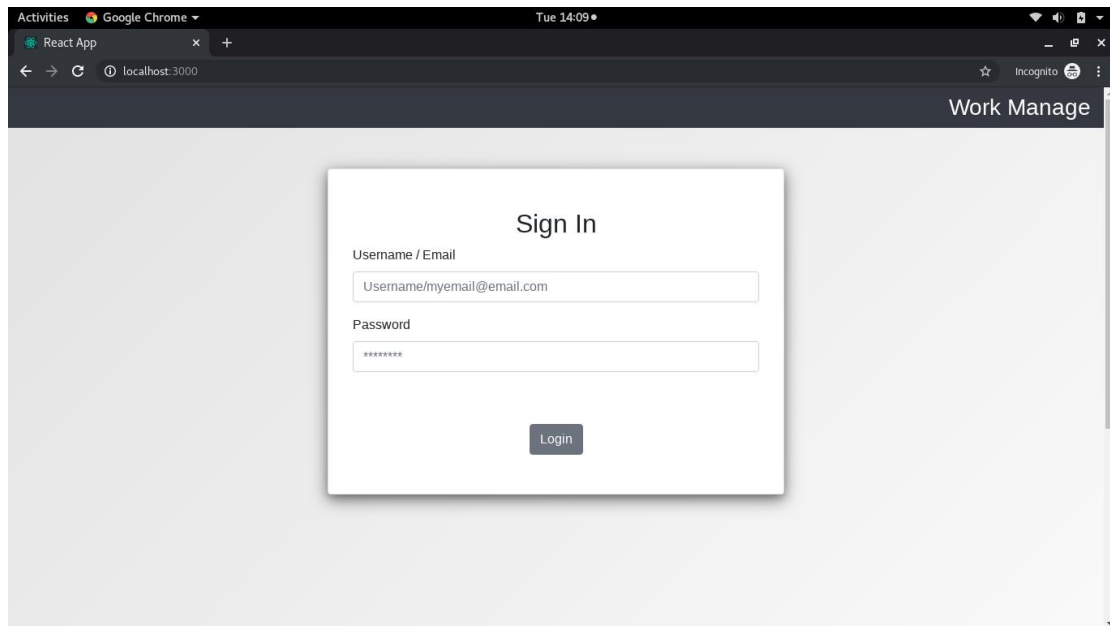

1. Manager can see employee data with same division (example : manager have division Programmer so the manager can see data employee have a division Programmer)
2. Can give a task to employee in the data with certain deadlines
3. Can see the salary every month
4. Manager can update profile like name, nik, phone number, email, etc
5. When the user upload the task manager can check (download file uploaded by employees) and give respond (finished or revised)
6. If the task revised manager can give explanation of reasons for revision
7. Have a dashboard for see (Data Employee have a same Division, Number of tasks each employee, 5 people who are often late this month)

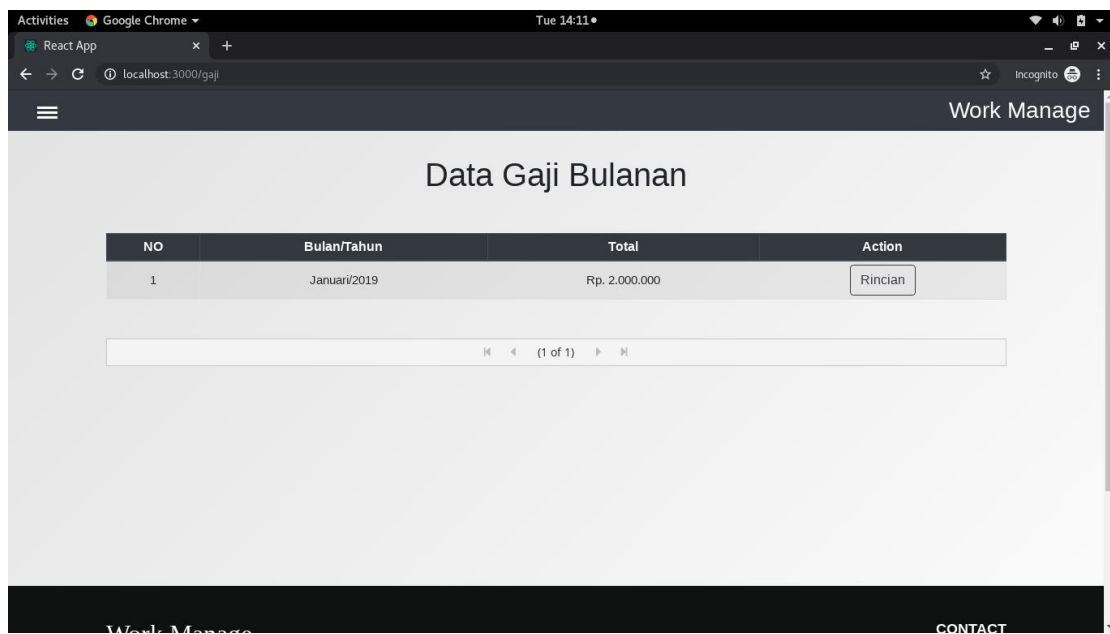

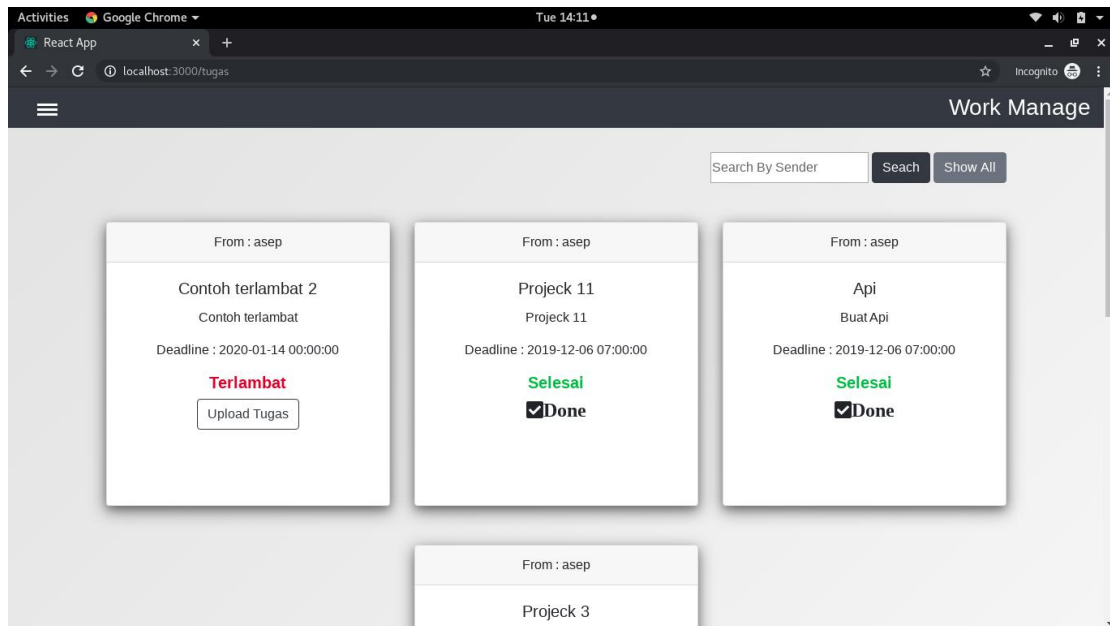

* The manager can only see data with the same division

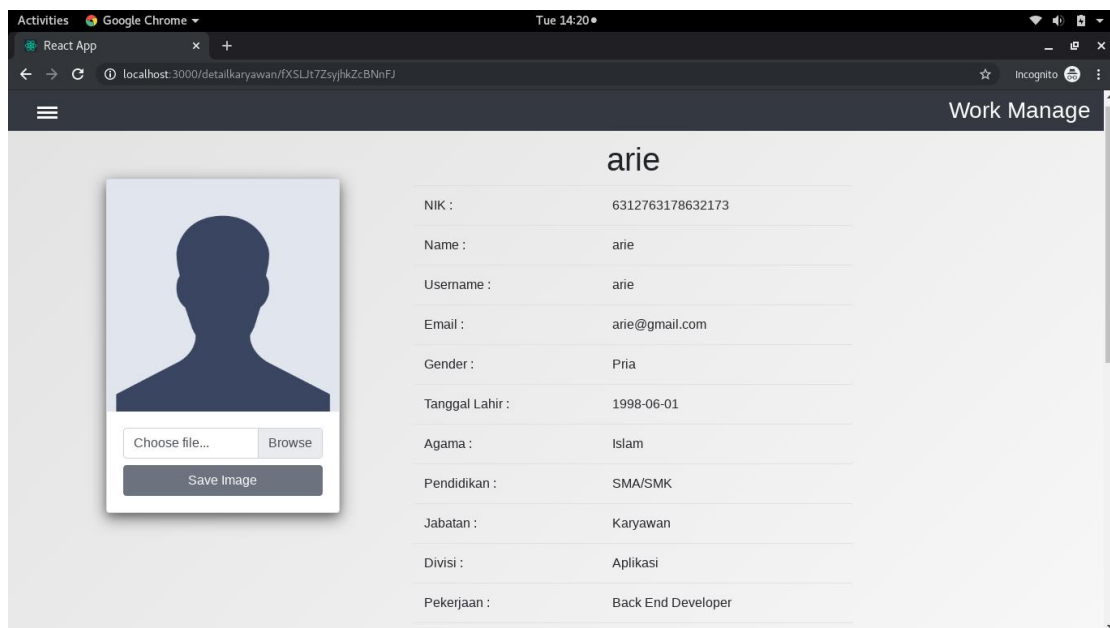

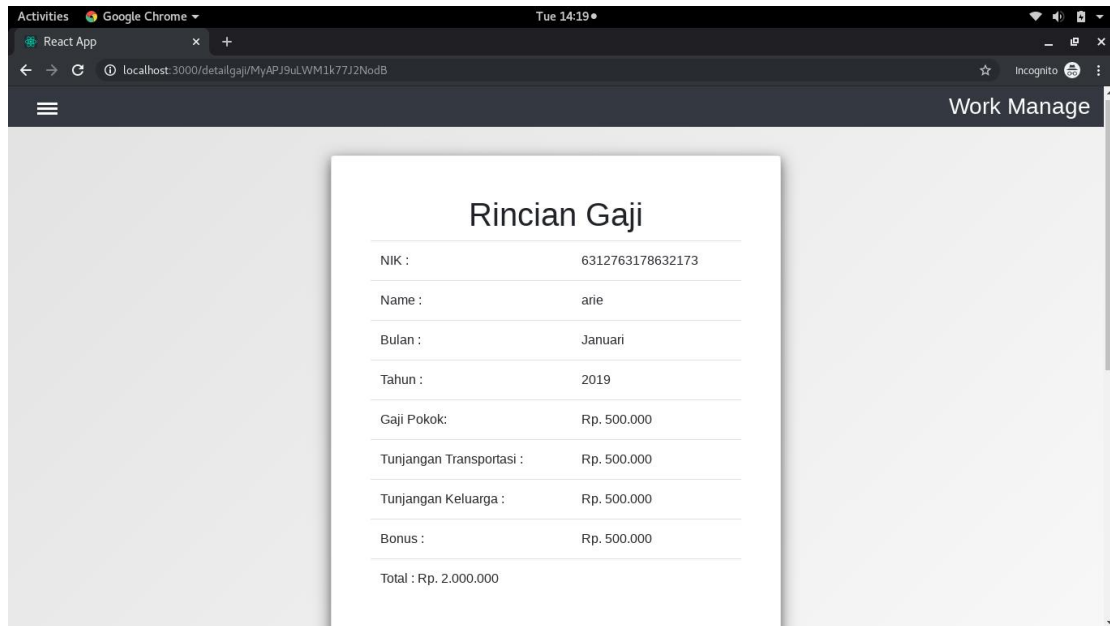

(Admin) :

1. Have Dashboard for see
 - Data All Employee
 - Data on the number Task Every Division
 - Salary average of each division
 - Salary average of each Subdivision(Profession)
 - 5 people who are often late this month
2. Admin can give salary to every employee and manager
3. Can see salary each employee and manager every month
4. Can see all data employee and manager
5. Admin can edit profile like name, profession, nik, etc
6. Admin can edit profile employee and manager like name, profession, nik, etc
7. If want to add division and subdivision (profession) admin can do this
8. Admin can add or delete the employee
9. Have a history every activities undertaken by employees and managers

* the data in the admin is accumulated all data not per division
